Full-Stack Engineer • AI / LLM Developer

PROFESSIONAL SUMMARY

Full-Stack & AI Engineer with proven experience building MERN-stack web apps and autonomous AI agents using LLMs (Gemini, OpenAI), LangChain, RAG pipelines, and Vector DBs. Delivered end-to-end production systems — from JWT-secured APIs to multi-turn agentic workflows with real-time API orchestration. Passionate about building intelligent, scalable products that solve real-world problems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, HTML/CSS

Frontend: ReactJS, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST APIs, JWT, Google OAuth

AI / ML: LangChain, RAG, Agentic AI, Prompt Engineering, Function Calling, OpenAI API, Gemini API, Hugging Face Transformers, FAISS, Chroma

Databases: MongoDB, MongoDB Atlas, SQL

Cloud & DevOps: AWS, GCP, Azure, Docker, Vercel, Heroku, GitHub Actions

Tools & APIs: Git, Postman, VS Code, Google Maps/Places/Calendar APIs, Razorpay, OSRM API, Folium, Google OR-Tools

PROJECTS

Pro-Active AI Assistant

[Github](#)

Jul 2025

Python | Google Gemini 1.5 | LangChain | Google Places & Calendar APIs | GCP

- Built an autonomous AI agent with persistent multi-turn memory using Google Gemini 1.5, enabling context-aware, goal-driven user interactions.
- Integrated Google Places API for real-time restaurant discovery and Google Calendar API for availability checks, event creation, and automatic invite dispatch — all via function calling.
- Reduced team dinner planning from ~20 minutes of manual coordination to under 3 minutes — surfacing 5 restaurant options, checking availability, and dispatching calendar invites entirely via natural language.
- Designed agentic workflow decomposition that breaks high-level goals into sequenced, fault-tolerant API calls and conversation turns.

TOMATO – Food Ordering Platform

[Github](#)

Sep 2025

ReactJS | Node.js | Express.js | MongoDB | Razorpay | JWT

- Designed and deployed a production-ready food ordering platform designed to serve 1,200+ concurrent users, featuring a 1km geo-filtered restaurant discovery system and a full admin panel for order and payment management.
- Integrated Razorpay payment gateway for secure transactions with real-time order status updates and webhook handling.
- Implemented JWT-based session management and optimized REST APIs for high-throughput order processing.

Task Tracker Application

[Live](#)

[Github](#)

Nov 2025

Next.js | TypeScript | Node.js | MongoDB | JWT | Google OAuth 2.0

- Built a secure task management system with JWT authentication and Google OAuth 2.0 for frictionless single sign-on.
- Implemented full-text search, multi-field filtering, priority/status indicators, and overdue alert notifications.
- Deployed frontend on Vercel and backend on Heroku with protected API routes and strict per-user data isolation.

Smart Waste Route Optimizer

Dec 2024

Python | Google OR-Tools | OSRM API | Folium | GIS

- Solved Capacitated Vehicle Routing Problem (CVRP) using Google OR-Tools with real-world road distances from the OSRM API.
- Simulated 7-day collection cycles for 15+ bins factoring in bin weight, geolocation, and collection frequency — reducing total travel distance vs. naive strategies.
- Generated interactive Folium maps for route visualization, enabling data-driven operational decisions.

EXPERIENCE

Associate Business Analyst — Dentsu Sokrati

Jan 2026 – July 2026 | Pune

- Tracked and analyzed campaign KPIs (CAC, IPA, conversion rate, engagement rate) across BAGIC and Tata Neu affiliate campaigns, surfacing optimization opportunities for vendor and client teams.
- Managed affiliate marketing campaigns across email, SMS, WhatsApp, and RCS traffic inventories using CPS, CPL, and CPE costing models.
- Built and maintained WoW/MoM performance reports and SCRUM dashboards for multiple client accounts, improving reporting accuracy and decision speed.
- Coordinated vendor performance reviews, collected monthly projections, and evaluated inventory quality to maximize campaign ROI.

Web Developer Intern — Coding Bits

Jun 2024 – Jul 2024 | Delhi

- Built a full-stack web application using React.js, Node.js, Express.js, and MongoDB covering UI, API integration, and database management.
- Designed and optimized RESTful APIs and responsive UI components, improving overall application performance and user experience.

EDUCATION

B.Tech in Computer Science — BML Munjal University

Sep 2022 – Aug 2026 | Gurugram

CGPA: 8.10 / 10

ACHIEVEMENTS & LEADERSHIP

- Smart India Hackathon 2024 (College Round) — 1st Place, outperforming 40+ teams with an innovative tech solution.
- Operations Lead, Smart India Hackathon & Hacked 2.0 (Dec 2023, Feb 2024) — Managed logistics for 350+ participants.
- Won 20+ medals in Karate Championships and Powerlifting competitions.
